Storm Sewer System Capital Program

2007-2011 Adopted Capital Improvement Program

Overview

Introduction

The purpose of the Storm Sewer System is to collect storm water separate from the Sanitary Sewer System, assure its quality through best management practices, and convey it to nearby creeks and rivers. Most of the water flows northward to the Guadalupe River or Coyote Creek. The 2007-2011 Adopted Capital Improvement Program (CIP) provides funding of \$12.8 million, of which \$5.0 million is allocated in 2006-2007.

This program is part of the Environmental and Utility Services City Service Area (CSA) and supports the *Reliable Utility Infrastructure* outcome.

Program Priorities and Objectives

In accordance with the City's General Plan, the goals of the Storm Sewer System Capital Program are to reduce the risk of drainage-related surface damage and protect the quality of storm water runoff. This complies with the municipal storm sewer discharge permit issued to the City by the Regional Water Quality Control Board under the regulations mandated by the Environmental Protection Agency. The City of San José is responsible for constructing, as budgets and City Council priorities permit, facilities for conveying surface runoff in the City's Urban Service Area to adjacent stream channels. Construction of flood control facilities and the modification and maintenance of stream channels are the responsibility of the Santa Clara Valley Water District and the U.S. Army Corps of Engineers.

The existing storm sewer system within the urban service boundary is approximately 900 miles long. San José's Storm Sewer System capacity in most areas can accommodate a

three-year storm event. However, the storm system in certain areas can only accommodate a one-year or less-intense storm. New and replacement storm drain pipelines must be designed to accommodate a ten-year storm.

Storm sewer systems in newly developed areas are primarily constructed by developers as a condition of development. The CIP provides funding for projects in developed areas to enhance existing capacity and improve operations and maintenance.

In previous years, the Storm Sewer System CIP had directed the majority of its resources toward the design and construction of storm sewer systems that serve large drainage basins. Only a modest portion of its resources had been allocated to the resolution of localized drainage problems, primarily in residential neighborhoods. Continuing the strategy implemented in the 2006-2010 Adopted CIP, this Adopted CIP includes additional funding that will address local ponding and neighborhood drainage issues such as damaged or inadequate curbs and gutters.

Sources of Funding

Revenue for the 2007-2011 Adopted CIP is derived from the following sources: transfers from the Storm Sewer Operating Fund (\$7.3 million), Storm Drainage Fees (\$2.6 million), Redevelopment Agency (\$420,000), interest earnings (\$341,000), and joint participation revenues (\$20,000). In addition, \$2.1 million from the available fund balance is programmed to support projects.

Storm Sewer System Capital Program

2007-2011 Adopted Capital Improvement Program

Overview

Sources of Funding (Cont'd.)

The Storm Sewer Operating Fund provides funding for capital improvement projects, the Storm Drain Management System, street sweeping, storm system maintenance, (SDMS), and the federally mandated Non-Point Source Pollution Control Program through Storm Sewer Service Charge fees. These charges are assessed annually on properties and collected with real property taxes.

A three-year rate increase strategy was approved by the City Council in June 2002 to increase the Storm Sewer Service Charge Fee by 4% in 2002-2003 and 4.5% in 2003-2004 and 2004-2005. This strategy ensured the fiscal health of the storm sewer system and maintained a modest capital program. In the 2006-2010 Adopted CIP, a new three-year 4.5% annual rate increase strategy (from 2005-2006 through 2007-2008) was given conceptual approval in order to fund additional capacity and neighborhood storm drain improvements described in the "Program Highlights" section below; ensure the fiscal health of the Storm Sewer Operating Fund; and improve the quality of storm water runoff in the City's Storm Sewer System. For 2006-2007, implementation of the second year of this Council-approved rate strategy was approved. In addition, the Storm CIP represented in this document assumes the continuation of 4.5% annual rate increases beyond the approved three-year rate increase period. If these out year rate increases are not approved, there will be significantly less funding available to transfer from the Operating Fund to the Capital Fund, necessitating a corresponding reduction in the scope of this Adopted CIP.

The Storm Drainage Fee is charged as a connection fee to the owner/developer of any project that will discharge storm water, surface water, or ground water runoff into the City's storm drainage system. Revenues are projected to total \$2.6 million over the five years of the 2007-2011 Adopted CIP, which represents an increase of \$38,000 (1.5%) compared to the estimate in the 2006-2010 Adopted Capital Budget.

Program Highlights

As discussed above, approved increases to the Storm Sewer Service Charge Fee are necessary to allow additional investments in capacity and neighborhood storm improvements in this Adopted CIP. The projects included in the five-year CIP include Albany-Kiely Storm Drainage Improvement, Phases II, III and IV (\$3.1 million), Willow Glen-Guadalupe, Phase III (\$1.6 million), Chateau Drive Storm Drain Improvement, Phases I & II (\$1.3 million), Storm Pump Station Rehab and Replacement (\$1.2 million), Ricon Storm System Improvements, Phase II (\$420,000), Ross-Guadalupe Storm Drain Improvements (\$401,000), Outfall Rehabilitation – Capital (\$300,000), and a series of minor neighborhood storm drain improvements (\$1.2 million). These projects will include the installation of technology and/or infrastructure to improve the capacity of the storm drain collection system, the quality of storm water runoff, and localized ponding in residential neighborhoods.

Albany-Kiely Storm Drainage Improvements

- Phase I, located along Albany Drive and Kiely Boulevard, between Lopina Way and San Tomas Creek, was completed in 1998.

Storm Sewer System Capital Program

2007-2011 Adopted Capital Improvement Program

Overview

Program Highlights (Cont'd.)

Albany-Kiely Storm Drainage Improvements (Cont'd.)

- Phase II, located along Albany Drive, between Kiely Boulevard and Richfield Drive, was awarded in 2004-2005 and is being constructed in 2005-2006.
- Phase III, located along Albany Drive, from Auburn Way to Richfield Drive, is scheduled for award in 2007-2008.
- Phase IV, located along Albany Drive from Stevens Creek Boulevard to Richfield Drive, is scheduled for award in 2010-2011.

These improvements will help to alleviate recurring drainage problems in the Albany-Kiely neighborhood and along one segment of Stevens Creek Boulevard through the installation and rehabilitation of existing storm drain pipe, as well as water quality devices.

Willow Glen-Guadalupe Phase III

Phase III of this project consists of the installation of new and rehabilitation of existing storm drainage pipes along various neighborhood streets west of Lincoln Avenue between Pine Avenue and Nevada, Glenwood and Mildred Avenues. This phase completes the remaining storm drain construction improvements to this area and is scheduled for completion in 2009-2010.

Chateau Drive Storm Drain Improvement Phases I and II

Phases I and II of this project, located on Chateau Drive near Hampton Drive, include the upsizing of the existing storm drain to address periodic flooding. Phase I of this project is scheduled for completion in 2007. Phase II will be completed in 2009.

Storm Pump Station Rehab and Replacement

The Department of Transportation has identified several aging storm pump stations in need of replacement or rehabilitation. In the 2006-2010 Adopted CIP, \$1 million was allocated for the rehabilitation of two pump stations. In the 2007-2011 Adopted CIP, an additional \$500,000 is programmed for the replacement or rehabilitation of other high-priority storm pump stations. In future years, as funding permits, other aging pump stations may be programmed for replacement or rehabilitation.

Ross-Guadalupe Storm Drain Improvements

The Ross-Guadalupe Storm Drain Improvement project (\$401,000) will address occasional drainage problems along Cherry Avenue near Ross Creek during the wet season by augmenting the drainage capacity of this system. Storm drain pipelines, catch basins, laterals and other appurtenances will be constructed along Cherry Avenue immediately south of the creek. This project is scheduled for completion in 2010-2011.

Storm Sewer System Capital Program

2007-2011 Adopted Capital Improvement Program

Overview

Program Highlights (Cont'd.)

Minor Neighborhood Storm Drain Improvements

Various smaller neighborhood storm drain improvement projects are included in this CIP. These projects include the construction of new inlets, laterals, and flow-lines to provide relief for minor drainage problems and address water quality issues. In addition, this allocation funds other activities such as the videotaping of storm drain pipelines to diagnose drainage problems and the correction of improper inflow, i.e. storm drain runoff misdirected to the sanitary sewer collection system. \$1.2 million is allocated in this Adopted Budget to address these needs.

Major Changes from the 2006-2010 Adopted CIP

Major changes from the 2006-2010 Adopted CIP include the following:

- Additional funding in the amount of \$250,000 for the Storm Pump Station Rehabilitation and Replacement project, which will design and replace or rehabilitate aging pump stations.
- Additional funding in the amount of \$500,000 for the Storm Drain Improvements – Special Corridors project to improve local drainage with the reconstruction of curbs, gutters, and other infrastructure.
- Additional funding in the amount of \$754,000 to fund Phases III and IV of the Albany-Kiely Storm Drainage Improvement project.

- New funding in the amount of \$300,000 for the Outfall Rehabilitation – Capital project to rehabilitate existing storm outfalls and install new storm outlets, and associated pipes and appurtenances at various locations.

Operating Budget Impact

The Department of Transportation maintains the City's Storm Sewer System. There are no additional operating and maintenance costs associated with the projects in the 2007-2011 Adopted CIP.

Council Approved Revisions to the Proposed Capital Improvement Program

During the June budget hearings, the City Council approved the rebudgeting of \$989,000 for six projects: Rincon Storm System Improvements, Phase II (\$420,000), Alma Storm Drain Improvement (\$220,000), Minor Neighborhood Storm Drain Improvements (250,000), Albany-Kiely Storm Drainage Improvement, Phase III & IV (\$80,000), Miscellaneous Projects (\$15,000) and CIP Database Enhancement (\$4,000).

Storm Sewer System Capital Program

2007-2011 Adopted Capital Improvement Program

Detail of Capital Projects

1. Albany-Kiely Storm Drainage Improvement, Phase III & IV

CSA: Environmental and Utility Services **Initial Start Date:** 1st Qtr. 2004
CSA Outcome: Reliable Utility Infrastructure **Revised Start Date:** 3rd Qtr. 2006
Department: Public Works **Initial Completion Date:** 1st Qtr. 2006
Council District: 1 **Revised Completion Date:** 2nd Qtr. 2009
Location: Albany Drive from Kiely Boulevard to Richfield Drive

Description: Phase III consists of the installation of approximately 500 linear feet of 54-inch to 60-inch diameter reinforced concrete pipe (RCP), along Albany Drive from Auburn Way to Richfield Drive. Phase IV consists of the installation of approximately 3,200 linear feet of 24-inch to 48-inch diameter RCP, along Albany Drive from Stevens Creek Boulevard to Richfield Drive, along Miramar Avenue from Albany Drive to Casa View Drive, and along Capistrano Avenue from Albany Drive to approximately 500 feet southwest of Albany Drive. All phases include the construction of new manholes, storm inlets, and laterals.

Justification: These improvements will upgrade the existing capacity of the storm drainage system to meet City standards. The utility infrastructure in the San José Storm Sewer System is aging and requires increased maintenance. This project will increase storm drain capacity, maintain system reliability, and minimize maintenance costs in the area.

EXPENDITURE SCHEDULE (000'S)

Detail of Capital Projects

2. Chateau Drive Storm Drain Improvement, Phase I & II

| | | |
|--------------------------|------------------------------------|---|
| CSA: | Environmental and Utility Services | Initial Start Date: 3rd Qtr. 2005 |
| CSA Outcome: | Reliable Utility Infrastructure | Revised Start Date: |
| Department: | Public Works | Initial Completion Date: 2nd Qtr. 2007 |
| Council District: | 10 | Revised Completion Date: |
| Location: | Chateau Drive and Hampton Drive | |

Description: This project upsizes the existing storm pipeline system on Chateau and Hampton Drives. Phase I consists of the installation of approximately 1,400 linear feet of 15-inch to 30-inch diameter reinforced concrete pipe (RCP), along Chateau Drive, from Olive Branch Lane to approximately 500 feet west of Hampton Drive, including construction of new manholes, storm inlets and laterals. Phase II consists of the installation of approximately 1,100 linear feet of 33-inch to 36-inch diameter RCP along Chateau Drive, from approximately 300 feet east of Chateau Court to Hampton Drive, including construction of new manholes, storm inlets, laterals and outfalls.

Justification: Periodic storm water floods portions of Chateau Drive due to inadequate drainage capacity.

| Department: | Public Works | Initial Completion Date: 2nd Qtr. 2007 |
| Council District: | City-wide | Revised Completion Date: |
| Location: | City-wide | |

Description: This project will rehabilitate existing storm outfalls or install new storm outfalls, and associated pipes and appurtenances, at various locations throughout the City. The Department of Transportation has identified approximately 250 outfall locations needing improvements. Project locations will be selected based on a priority list to be developed by the Department of Transportation in conjunction with Public Works staff.

Justification: This project will repair aging outfall structures, enhance erosion protection, and alleviate maintenance operations.

Storm Sewer System Capital Program

2007-2011 Adopted Capital Improvement Program

Detail of Capital Projects

6. Rincon Storm System Improvements, Phase II

CSA: Environmental and Utility Services **Initial Start Date:** Multi-Phase

CSA Outcome: Reliable Utility Infrastructure **Revised Start Date:**

Department: Public Works **Initial Completion Date:** Multi-Phase

Council District: 4 **Revised Completion Date:**

Location: Trimble Rd from Junction Ave to Guadalupe River.
Revised limits: First St to Guadalupe River

Description: This project consisted of the construction of a pump station and drainage pipelines along Trimble Rd within the drainage boundary of the Guadalupe River. Funding in the 2007-2011 CIP is allocated for mitigation efforts due to the environmental impact of this project. The proposed mitigation site is approximately 14 miles south of the Rincon Pump Station. The site is located along Camden Ave between Royalwood Way and Bluffwood Court. Arroyo Calero Creek borders the site to the north Camden Ave to the south.

Justification: Storm sewer improvements were needed to alleviate recurring drainage problems in the area. After project completion, the goal of the mitigation is to establish dense riparian forest with a multi-layer canopy of plant species native to the Arroyo Calero Creek watershed. By the end of the third year, the plantings should be well established and self-sustaining with little need for supplemental irrigation and maintenance.

ANNUAL OPERATING BUDGET IMPACT (000'S)

None

Major Changes in Project Cost:

September 2001 - Resolution # 26484 - increase of \$375,000 to reflect updated construction costs.
 2003-2007 CIP - increase of \$2.1 million to reflect updated construction costs.
 2004-2008 CIP - increase of \$400,000 to reflect updated construction costs.

Notes:

Due to a lack of accessible parcels along the Guadalupe River, the California Department of Fish and Game (CDFG) designated an area along Arroyo Calero Creek as the site for the mitigation of impacts caused by this project.

FY Initiated: 1999-2000 **Redevelopment Area:** Yes
Initial Project Budget: \$24,225,000 **SNI Area:** N/A

Detail of Capital Projects

7. Storm Drainage Improvements - Special Corridors

CSA: Environmental and Utility Services **Initial Start Date:** 3rd Qtr. 2005
CSA Outcome: Reliable Utility Infrastructure **Revised Start Date:**
Department: Public Works **Initial Completion Date:** 2nd Qtr. 2006
Council District: City-wide **Revised Completion Date:** 2nd Qtr. 2007
Location: City-wide

Description: This funding provides for the investigation of ponding complaints; development of strategies to improve local drainage with the reconstruction of curbs, gutters, and other infrastructure as indicated; development of construction plans; and management of the construction of these improvements. Public Works staff will also document ponding problems that the Department of Transportation staff observes and reports.

Justification: Ponding storm water within neighborhoods has the capacity to cause localized flooding problems.

Storm Sewer System Capital Program
2007-2011 Adopted Capital Improvement Program
Detail of Capital Projects

12. Master Planning

| | | | |
|--------------------------|------------------------------------|---------------------------------|---------|
| CSA: | Environmental and Utility Services | Initial Start Date: | Ongoing |
| CSA Outcome: | Reliable Utility Infrastructure | Revised Start Date: | |
| Department: | Public Works | Initial Completion Date: | Ongoing |
| Council District: | City-wide | Revised Completion Date: | |
| Location: | City-wide | | |

Description: Master planning for San José's Storm Sewer System provides for overall design, mapping, and identification of existing and ultimate sizes of main trunk drains, outfalls, and laterals. The most efficient use of outfall basins and minimization of the number of outfalls are primary goals of master planning. Equipment, composed of workstations with accessories and software to interface with the City's intergraph mapping system, will be upgraded as new technology develops.

Justification: Master planning will identify potential deficiencies caused by existing undersized drains and will identify areas in need of Storm Sewer System upgrades.

13. Permit Review and Inspection for Outside Agencies

| | | | |
|--------------------------|------------------------------------|---------------------------------|---------|
| CSA: | Environmental and Utility Services | Initial Start Date: | Ongoing |
| CSA Outcome: | Reliable Utility Infrastructure | Revised Start Date: | |
| Department: | Public Works | Initial Completion Date: | Ongoing |
| Council District: | City-wide | Revised Completion Date: | |
| Location: | City-wide | | |

Description: City staff performs many services for the review and inspection of projects for the Santa Clara Valley Water District. As is customary practice between public agencies, and per State law, the City and Water District do not charge one another for these services. Therefore, neither entity recovers its costs from the other.

Justification: City staff reviews plans, issues encroachment permits, and inspects the construction of Water District projects that are located within or will impact the City's right-of-way. Staff work is essential to ensure the safety of construction activities of the Water District's contractor, and the quality control of these projects. Failure to do so will result in the increased potential for undesirable traffic impacts (e.g. accidents) and impacts of the contractor's activities on public and private utility infrastructure.

14. Preliminary Engineering

| | | | |
|--------------------------|------------------------------------|---------------------------------|---------|
| CSA: | Environmental and Utility Services | Initial Start Date: | Ongoing |
| CSA Outcome: | Reliable Utility Infrastructure | Revised Start Date: | |
| Department: | Public Works | Initial Completion Date: | Ongoing |
| Council District: | City-wide | Revised Completion Date: | |
| Location: | City-wide | | |

Description: This allocation provides funding to support preliminary engineering for storm sewer related projects, including surveys and evaluations of project impacts on the storm sewer system.

Justification: Preliminary engineering is required to define the scope and develop cost-effective solutions to storm sewer issues.

Storm Sewer System Capital Program
2007-2011 Adopted Capital Improvement Program
Summary of Projects that Start after 2006-2007

Project Name: Ross-Guadalupe Storm Drain
Improvements
5-Year CIP Budget: \$401,000
Total Budget: \$401,000

Council District: 9
Estimated Start Date: 3rd Qtr. 2010
Estimated End Date: 4th Qtr. 2011

Description: This project includes the installation of approximately 700 feet of 42-inch reinforced concrete storm drain pipe with the associated manholes, catch basins, and any needed curb and gutter installation to improve drainage on Ross Avenue at the vicinity of Ross Creek.

Project Name: Willow Glen-Guadalupe, Phase II &
III
5-Year CIP Budget: \$1,560,000
Total Budget: \$3,753,704

Council District: 6
Estimated Start Date: 3rd Qtr. 2008
Estimated End Date: 2nd Qtr. 2010

Description: This project consists of the installation of new and rehabilitation of existing storm drainage pipes along various neighborhood streets west of Lincoln Avenue between Pine Avenue and Nevada, Glenwood and Mildred Avenues. This project was broken down into several phases. Phase I was completed in 1999. Phase II was completed in September 2005. Phase III, which completes the remaining storm drain construction improvements to this drainage basin, is scheduled to be completed in 2009-2010.

Storm Sewer System Capital Program

2007-2011 Adopted Capital Improvement Program

Summary of Projects with Close-out Costs Only in 2006-2007

Project Name: Alma Storm Drain Improvement
5-Year CIP Budget: \$220,000
Total Budget: \$1,478,329
Council District: 7

Initial Start Date: 1st Qtr. 2005
Revised Start Date:
Initial End Date: 3rd Qtr. 2006
Revised End Date:

Description: This allocation will provide funding for the design and construction of a storm drain system in the Alma neighborhood. Project scope includes roadway grading and the installation of storm drain pipelines, curbs, gutters, catch basins, and storm drain laterals. Funding from other jurisdictions would contribute to the total cost of this project.

Project Name: CIP Database Enhancement
5-Year CIP Budget: \$4,000
Total Budget: \$4,000
Council District:

Initial Start Date: 3rd Qtr. 2004
Revised Start Date:
Initial End Date: 2nd Qtr. 2007
Revised End Date:

Description: The CIP Database is used to monitor, track, schedule and estimate capital projects. This allocation is necessary to continue the City Manager's Office directed CIP Database Enhancement Project.
